## True **SHORT WAVE** curing

### Lightweight • Compact • Portable

- Achieves full temperature in seconds
- Cures from the panel surface outward
- Faster cure times than competitive models
- Separate flash-off and cure settings
- Easy to adjust for head height
- Adjusts to give roof to rocker coverage
- Head can be mounted on stand for horizontal application, or hand held for vertical application
- Great for hard to reach areas and patch repairs
- Works great on panel bonding
- Portable, use anywhere in the shop
- Lightweight stand

### **S1000** Portable Curing Unit

- 1000 Watts of short wave curing power
- 120 Volts, 8.3 Amps
- 24" and 18" curing area
