New, heavy duty stand

A Full Line of SHORT WAVE Tungsten Halogen Infrared Curing Systems

- Greatly speeds curing times of primers, top coats, and panel adhesives, with significantly faster cure times than conventional curing lamps
- Achieves full curing temperature in seconds
- Cures from the panel surface outward
- Separate flash-off and cure temperature settings

S4000HD

- Arms adjust heads from a vertical position for flat surfaces to an offset position for curing fenders and hoods at the same time
- New heavy duty stand has a wide stance for stability, and is designed to easily roll between cars in the shop
- Separate flash-off and cure timers

S2000HD

- New ball-and-socket head-adjusting system. Head rotates and swivels for vertical or horizontal applications.
- New heavy duty stand has a wide stance for stability, and is designed to easily roll between cars in the shop
- Separate flash-off and cure timers

S1000

- Features a light-weight, compact stand for curing in hard-to-reach areas, such as under wheel wells and inside trunks for panel bonding
- Can be removed from stand and used as a hand-held unit

Model	No. of Watts	Heads	Timer	Volts	Amps	Curing Area
S4000HD	4000	2	Yes	240	16.6	5'6"x3'
S2000HD	2000	1	Yes	120	16.6	2'6"x3'
S1000	1000	1	No	120	8.3	18"x24"
